

CO2 Neutral label certificate

PRODUCT LABEL - SILVER LEVEL

BeFre

REUSABLE BAGS ONLY

Client reference: N° 23/440
Certification start date: 20/11/2023
Certification end date: 19/11/2024

CO2logic certifies that **BeFre** has calculated the carbon footprint of its **reusable bags made of paper, cotton and plastic**, set up a concrete reduction plan and offset remaining emissions (**1647 tCO2**) by supporting certified climate projects.

The operational scope of work covers **cradle to grave emissions** (climate impact only) including: **raw materials, production, transport, packaging (pallets), and end of life for the period 2022**. The level of maturity of this product has been calculated using a weighted assessment matrix that reflects all specificities of a product and evaluates these against climate ambitions.

BeFre **ambition** is to reduce the **reusable bags** emissions as follows:

- to **reduce the emissions** of its reusable bags **by 28% by 2030** in comparison with base year 2020.
- to **yearly offset remaining emissions** through certified carbon credits.

Every CO2 Neutral label is reviewed and validated by Vinçotte, an independent international certifying authority. Through an in-depth audit, Vinçotte controls the implementation of the CO2logic approach: calculate, reduce and offset CO2 emissions.

All informations related to the CO2logic approach and the certification process can be consulted on our dedicated website www.co2-neutral-label.org and all the information related to this climate journey is made available through the individual QR code present on the label:
